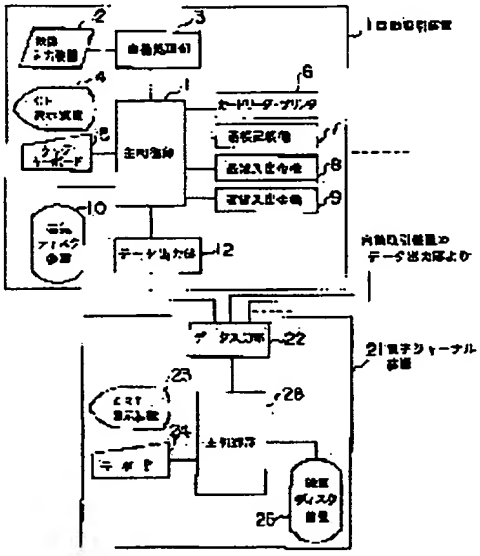
(54) ELECTRONIC JOURNAL SYSTEM


(57)Abstract:
PURPOSE: To provide an electronic journal system in which a transaction operated by plural automatic transaction devices can be instantaneously retrieved and displayed in a batch, and the transaction operated by the automatic transaction device and the video of an automation corner monitor camera can be displayed so as to be made to correspond to each other.
CONSTITUTION: This system is constituted of plural automatic transaction devices 1 constituted of a video inputting device 2 which photographs the face of a user, picture processing part 3 which converts a video signal outputted from the video inputting device 2 into recording data, and data outputting part 12 which synthesizes transaction detail data with the recording data, and outputs the data, and one electronic journal device 21 constituted of a data inputting part 22 which inputs data transmitted from the automatic transaction devices 1, magnetic disk device 25 which stores the inputted data, and CRT display device 23 which appropriately displays the data.
